PROFESSIONAL SUMMARY

I connect complex technology to the people who need to understand and adopt it.

Over 15 years at Microsoft, I've helped enterprise customers deploy identity and endpoint management solutions while carrying their real-world feedback back to engineering teams to shape better products.

CORE SKILLS

Identity & Security: Microsoft Entra ID | MFA | Conditional Access | Zero Trust | Passwordless | PKI | AD FS

Endpoint & Systems Management: Microsoft Intune | Windows Autopilot | Apple Business Manager

AI & Knowledge Engineering: LLM Governance | Information Architecture | Docs-as-Code (Git/GitHub)

Data Engineering & Analytics: Azure Data Explorer (Kusto) | Azure SQL | Databricks | PowerShell

PROFESSIONAL EXPERIENCE

Microsoft | 2010 – 2026

Senior Knowledge Engineer, Intune | Aug 2025 – July 2026

Built the AI-driven governance infrastructure and information architecture behind Microsoft Intune's technical documentation, partnering with PMs and working across Security Copilot, identity, and Windows engineering teams.

- Partnered with Intune PMs to develop and maintain technical content, including passwordless authentication, Intune platform capabilities, and What's New articles.
- Built a modular governance framework for AI-assisted documentation, released for cross-team use with early adoption by other Microsoft Security documentation areas including Purview and Entra.
- Designed Intune's information architecture and executed the structural overhaul across all 1,000+ documentation assets in 3 weeks, a scope typically taking months.

Senior Technical Writer, Windows Security | Sep 2022 – Aug 2025

Authored Windows Commercial security content for IT professionals on Microsoft Learn and consumer-facing Windows guidance on Microsoft Support, using performance telemetry and customer feedback analytics to guide content decisions across thousands of assets.

- Wrote Windows Security documentation for high-visibility corporate initiatives, including passkeys and the Windows portion of Microsoft's Secure Future Initiative (SFI).
- Modernized the Windows Security Book by migrating it from PDF to markdown on Microsoft Learn, opening it to direct contribution from PMs across the product.
- Built an AI-powered pipeline that parsed thousands of raw user verbatims at scale to surface the small share that were actionable for the writing team.
- Owned Windows security licensing documentation, coordinating with engineering, marketing, and legal for review and sign-off to publish clear, authoritative compliance guidance.

Senior Program Manager, Identity and Network Access | Jan 2022 – Sep 2022

Managed data and analytics strategy for Microsoft's IDNA group, turning cloud adoption telemetry and third-party competitive intelligence into product insight and building the data fluency that shaped subsequent roles.

- Built telemetry pipelines analyzing enterprise customer migrations from Active Directory / AD FS to Microsoft Entra. Findings directly informed development of the AD FS application migration tool.

Senior Program Manager, Microsoft Intune | Mar 2018 – Jan 2022

Part of Microsoft's customer acceleration team (CAT), working directly with education customers worldwide to drive Intune adoption while carrying their feedback back to engineering to improve the product.

- Drove Intune adoption across dozens of school districts globally, including one district reaching 255,000 managed endpoints, one of the largest Intune Education footprints in the world. Fed customer signal back to Intune engineering to shape product priorities and roadmap.
- Built a YouTube training series for Intune that grew to 20K+ views, extending customer education beyond what in-person workshops could reach.
- Delivered Intune deployment workshops and technical POCs at international education technology conferences (including BETT London), presenting to audiences of up to 200 IT professionals and running product evaluations for prospective customers.

Senior Consultant, Identity | 2014 – 2018

Worked in Microsoft Consulting Services with Fortune 500 and government customers to modernize their identity infrastructure.

- Advised Fortune 500 customers across energy, consumer goods, and pharma on modernizing their identity infrastructure, guiding them from legacy on-premises systems toward cloud-native identity.
- Designed the first passwordless-authentication engagement within Microsoft Consulting Services (MCS), creating the customer deployment guide that was then adopted as internal MCS documentation, and contributed to Microsoft Learn's public WHfB documentation.

Premier Field Engineer, Platforms | 2010 – 2014

Supported Premier enterprise and government customers, delivering proactive Active Directory and Windows platform engagements and rapid on-site incident response.

- Delivered on-site Active Directory risk assessments and upgrade engagements for Fortune 500 customers in pharma, banking, and consumer goods, including environments spanning 200+ domain controllers and thousands of sites.
- Ran on-site technical workshops for customer IT teams, both as part of engagements and as standalone education, translating deep Active Directory expertise into training that customer teams could apply.
- Ran full-forest AD disaster recovery simulations for enterprise customers, including multi-week engagements with global customer IT teams on-site.

EARLIER CAREER

Time Warner Cable, US | Active Directory Engineer | 2009 – 2010

BMW North America, US | Active Directory Engineer | 2009

Progel (Microsoft Partner), Italy | Active Directory Consultant | 2005 – 2008

Ampy Email Metering, Australia | Active Directory Engineer | 2005

IMA S.p.A., Italy | Active Directory Engineer | 2002 – 2004

EDUCATION & CERTIFICATIONS

Computer Engineering (Ingegneria Informatica) Coursework | Università di Bologna, Italy

Microsoft Certified: SC-300 and MD-102, expected Q4 2026

Older Credentials: MCITP: Enterprise Administrator, MCSA: Windows 10, Architecting Microsoft Azure Solutions

AWARDS & RECOGNITION

Microsoft Circle of Excellence

Microsoft Key Talent Award (2013, 2015)
